

Greetings from Alberta Canada!

Last April a Fatty with wrapped louvered went on my 09 Heritage that has a strong running T Man 107. Installation went seamlessly and the perfect fit was well appreciated, and then immediately on to the dyno. I am so fortunate to be a customer of probably the best efi tuner in the western US and Canada. End result is your pipe looks very good, sounds like a pipe should, it tuned in perfectly and after a full riding season I can say after 30 years of riding Harleys I have found the perfect pipe. Didn't take long eh?

Thanks to all involved

Thomas
